SwiftSet Folding Chair Trolley

The shape and construction of this chair provides stable positive indexing when stacked. Stacking density for the first chair is 460mm x 1080mm folded, yet only 45mm of depth for each additional chair.

Features

- 18 gauge oval steel tubing.
- Frame finish electrostatically applied, heat cured, powder paint formulated for outdoor use.
- Seat & back injection moulded UV stabilised polypropylene.
- Feet Injection moulded using non-marring thermo-plastic elastomer.
- Able to support a uniformly distributed load of 450kgs.
- Made in USA.
- 12 year warranty.

Options

- A large selection of frame and polypropylene shell colours are available.
- Ganging available.
- A large range of fabric and vinyls are available to cover optional 37.5mm foam padding on the seat and 19mm on the back.
- Custom logos available.
- Carts options from 48 to 96 capacities including under stage storage systems.
