

ATLANTIS GAMING STOOL
FAMILY

PRODUCT STORY

When consulting to clubs and casinos we focus on comfort, aesthetics and durability. Comfort has a direct impact on revenue. The design of the Atlantis gaming stool enables the patron to move easily and be comfortable throughout the desired period.

The Ultra Slide base unique to IG Design/Innova Group has been designed and engineered so that minimal effort is required to glide the stool around the gaming room floor. That's why some of the largest casinos and clubs in Australia have a preference for our gaming stools.
