

HANNA  
FAMILY

## PRODUCT STORY

The Hanna Event chair has a unique manufacturing origins. This event chair is uniquely manufactured, departing from the traditional steel or aluminium frame with upholstered inserts.

The "moulded foam/steel frame combination" technology has been employed in this product to craft a hyper comfortable experience which may include a flex back. The legs are not overly obvious in the design with the emphasis being on the seat and back. This becomes very obvious when in use especially for longer period during events.

## OPTIONS

The "moulded foam/steel frame combination" technology has been employed in this product to craft a hyper comfortable experience which may include a flex back.
