PRODUCT STORY

The Euro chair is the new standard when it comes to mass public seating. The improved design, style, and elegance set it apart, but it's the high-impact fully moulded polypropylene fabrication that delivers all the benefits. A seat so sleek and comfortable, yet no moving parts, no steel to rust, no feet to fall off. A custom moulded one-piece chair that does the lot. And it even includes Euro's easy built-in linking system at no extra cost! It's a true ALL-IN-ONE chair.

Available in a multitude of colours, stay with solids or be bold and mix it up. Stacking almost vertical up to 14 high, the sleek design keeps the height manageable. And the strong one-piece moulded construction makes them basically maintenance free!

Perfect for schools, universities, function rooms, community halls, training rooms, reception centres, churches, and all manner of multi-purpose seating.

**OPTIONS**
